

## 2. Housing

The following are a representative selection of the concerns expressed regarding housing and residential development.

- \* More affordable housing is required for young families and pensioners and not luxury homes for the individual.
- \* All new houses must be in sympathy with the surrounding environment.
- \* Growth of housing should be slow and mainly to meet local people's needs.
- \* The degree in which bureaucracy impacts on our lives.
- \* No large scale developments should be approved.
- \* No ribbon developments should be allowed along country lanes.
- \* The communication by the Parish Council on planning applications should be improved.
- \* There should be no change to the village character.
- \* There should be no expansion resulting in overcrowding of amenities and services.
- \* No perceived need for street lighting.
