

# 4. Health Services

## Conclusions

- \* By and large the vast majority of inhabitants are happy with their health services.
- \* The areas that caused some dissatisfaction were waiting times, the appointments system and its administration and parking at the medical centre.
- \* Other services required included a chiropodist, NHS Dentist and delivery of medicines (at least to a convenient local centre for collection).

## Objectives

- \* Communicate the results of the survey to the service providers and ask them to consider actions to meet the community's stated needs.
- \* Publish on the Parish website, at the Post Offices and in the Parish Newsletter where health and health related services can be obtained.
